AISI STANDARD

Errata to North American Standard for Cold-Formed Steel Framing – Wall Stud Design,
2007 Edition (Reaffirmed 2012)

Amendment on March 18, 2015

Endorsed by:

Steel Framing Alliance™
Errata to North American Cold-Formed Steel Framing—Wall Stud Design

Amendment on July 24, 2015

1. Revise Standard Section A3.1 Item (3) on Page 1 as follows:

“(c) Deflection limits based on 70% of Components and Cladding (C&C) wind loads with no axial loads.”

2. Revise Commentary Section A3 on Page 1 by adding the following sentence to the end of the section:

“The 42% is applied the ultimate Component and Cladding (C&C) wind load, without any additional applied load combination factors. The 0.42 (i.e. 42%) replaces the basic load factor in the load combination.”
